PROFILE

Fresh Computer Science (Network & Security) graduate with practical experience in full-stack development, cybersecurity, and system deployment. Seeking to leverage expertise in secure web applications, cloud infrastructure, and network optimization to drive innovation and operational excellence in a dynamic tech environment.

WORK EXPERIENCE

Full Stack Developer Intern

SEPT 2024 - FEB 2025

Kiswire Sdn Bhd - Johor Bahru, Johor

- Involved in the maintenance of systems, infrastructure enhancement, and process optimization.
- Participated in **database development, application framework modernization.**
- Participated in enhancing operational efficiency and facilitating technological innovation.
- Participated in **network deployment**, including **IP configuration** and **routing**.

EDUCATION

Bachelor of Computer Science (Network and Security)

2021 - 2025

Universiti Teknologi Malaysia - Skudai, Johor

Graduation: Nov 2025

- Coursework:** Network Security, Cryptography, Secure Programming, Application Development, Internet of Things
- Major projects:** Document Management System using Waterfall methodology, featuring Authentication, RBAC, Content Preference, and Collaboration
- CGPA:** 3.51
- Activities:** Robotic Club Member, IEEE Computer Society Volunteer, CyberDas Workshop (ITS Surabaya), Internship at Kiswire Sdn Bhd

SKILLS

- Network and Security Fundamentals(Route,Switch,Dns,Dhcp,etc)
- Web Development (Laravel, NextJS, NestJS-JS api framework)
- Effective Team Collaboration
- Proficient in English and Bahasa Melayu
- 3d Website(Spline & ThreeJS)

PROJECT

IEEE Computer Society Project: Learning Management System (Agile Methodology)

Universiti Teknologi Malaysia

NOV 2023 - DEC 2023

- Worked in a 5-person team to design and build Crunchy Code, a web-based platform aimed at introducing secondary school students to the basics of computer science.
- Implemented backend functionalities using the Laravel framework and deployed the application via **Heroku**.
- The project emphasized making coding enjoyable and interactive, in line with the "**Crunchy Code**" theme – fun, challenging, and rewarding.
- Actively participated in both frontend and backend development while gaining valuable hands-on experience in teamwork and real-world software development.
- **Stack** : Laravel, Composer, PHPMyAdmin, Heroku

Study Archive Management System (Waterfall Methodology)

Universiti Teknologi Malaysia

MAR 2024 - SEPT 2025

- Developed document management system for final year project.
- Implemented backend functionalities using the **NextJS** and deployed the application via **Vercel**.
- The project aim is to enhance student study experience and provide document sharing features to make study more collaborative.
- **Stack** : NextJS, TailwindCSS, Prisma, AuthJS, PostgreSQL, Vercel
- **Security element**: HTTPS, Two Factor Authentication(2FA), JSON Web Token(jwt), Role Based Access Control(RBAC), Authentication, client/server action
